"Ejercicio3" (2006) / Alejandro Albornoz / 03:44

A personal work that sought precisely to maintain my composition activity in acousmatic, which in those years relied on my own initiative and the workshops that were incipiently opened for an audience not limited only by university faculties.

This exercise contains some samples of an improvisation performed by the members of the Electro Workshop in a concert held in the Master Room of the Radio Universidad de Chile, on May 30, 2005.
